

Introducing IndiMag 2

The benchtop powerhouse for nucleic acid isolation

Discover the versatile, user-friendly, automated extraction system that rapidly isolates nucleic acids from a broad range of samples

IndiMag 2: Superior magnetic bead-based nucleic acid isolation

Flexible experiment design

- Start with a broad range of sample types
- Process 1 to 48 samples per run
- Use preloaded protocols or create your own with up to 4 washing steps

Precise temperature control

- Extensive temperature range from 4°C to 100°C
- Heat up to activate or accelerate reactions
- Cool down to stabilize extracted nucleic acids

User-friendly, safe automated system

- Intuitive touchscreen interface for setup and complete process control
- Enjoy quick and easy deck loading
- Easy sterilization with the inbuilt UV light

Hardworking, dependable platform

- Be confident with robust German engineering
- 2-year warranty as standard

Save even more time and plastics with IndiMag prefilled cartridges. Soon available with separate lysis and elution strips.

Product	Short description	Cat. no
IndiMag 2 (110~240 V)	Automated extraction system for rapid isolation of nucleic acids of up to 48 samples using magnetic bead technology, including a 2-year warranty as standard.	IN950048
